

WE HAVE A VOICE

1

Municipalities Will Have a Say!

The host municipality must have a veto for new and increasing bottled water-takings, to plan for future growth and effects of climate change on water supplies!

4

Yes To Transparency

Yes, it is essential that data is available to the public.

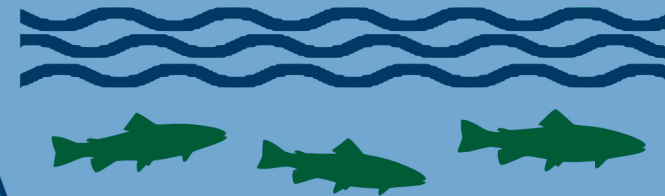

Now is YOUR chance to give feedback on THE MINISTRY'S NEW POLICIES FOR MANAGING WATER TAKING

4 Important Talking Points

Yes to People and The Planet Coming First

2

Water-taking decisions must prioritize the needs of environment, municipal drinking water and agriculture before industrial and commercial needs and water bottling.

Watch Out for The Watershed

3

It is difficult to understand ecosystem needs and impacts of water-taking. Attention must be paid to cumulative effects of many water takers on a regional area and watershed.
